Watch...and it winds itself

What makes the Swiss self-winding watch so wanted? Because it wants so little from you. Merely steering your car is enough to send its delicately balanced winding weight into action. Presto! You've a watch automatically wound for 36-or-more hours ahead!

The principle of self-winding watches is another of time's many miracles from the watchmakers of Switzerland. With a heritage in line watchmaking nearly 400 years old, these artisans have perfected the art of keeping you smartly ahead of time—all the time.
You'll see this in the wide variety of jeweledlever Swiss watches that serve you in so many new ways. In chronographs that sphit seconds—measure sound, speed and distance. In watches that are resistant to shock, water and mugnetism. In cases of fresh style and beauty.

The wonderland of modern, jeweled-lever Swiss watches now at your jeweler is exciting proof of how far time has come in the hands of the Swiss. See them all soon.

gare not profe for year profes for year graft. He's the specialist hest qualified to help you what — and to faithfully service your watch for all time.
